

WHAT TO DO WHEN FLOOD COMES

Stock clean water in secure containers at home

01

02

Make sure your gadget batteries are fully charged

03

Prepare emergency light, torch, and batteries

04

Move electronic devices to a dry place, stock drinking water and food as well

05

Secure important documents and other valuable belongings at a safe place

06

Identify an evacuation route and the nearest evacuation center

07

Write down and keep emergency contacts such as Ambulance, SAR team, etc

08

Avoid crossing the water even if it's only 15 cm high, the current can trip you

09

If it is necessary to cross the water, use a stick to measure the depth before you walk further

10

Wash your hands with soap before serving or having any meals

11

Shut off the electricity fuse if needed

12

Get your news update from trust-worthy sources
